CYBERSECURITY / IT SUPPORT CANDIDATE

Entry-level cybersecurity and IT support candidate with Security+, RCCE Level 1 & 2, Linux lab experience, Docker projects, and customer-facing troubleshooting work.

EXPERIENCE

Support Technician — POS Systems

Oct 2025 — Dec 2025

Installed, configured, maintained and troubleshoot POS hardware/software while communicating clearly with non-technical users.

Project Executive — Events & Operations

Oct 2024 — Dec 2024

Managed projects, vendors, timelines, reports and on-site execution — strong operational discipline transferable to IT support.

Personal Assistant / Event & Content Manager

Mar 2023 — Dec 2023

Managed logistics, documentation, announcements and executive support with confidentiality and coordination.

PROJECTS

Linux Home Lab

Repurposed laptop hardware into a Linux lab for systems practice, service management and troubleshooting.

Self-hosted Apps

Deployed Docker services including Immich with container networking, persistent storage and service automation.

Portfolio / Résumé Hosting

Built and hosted a personal site for static publishing, deployment and web fundamentals.
